**THE CROWN FOR YOUR KITCHEN**

# 1. TULIP COOKING

Tulip Cooking offers a refined yet spirited aesthetic that exemplifies contemporary Dutch design. Our design showcases the brightest innovations in the field from the world's only modular induction cook top with flexible burner placement, to gas burners with optimal fuel efficiency.

## TULIP COOKING

2.

Enhance your kitchen with the beautiful and expressive style of our gas cook tops, suitable for virtually any counter top material\*. Custom-tailor the look to your tastes, and enjoy advanced technology that makes it easier than ever for you to pursue your love of cooking.

### 3. REGINOX

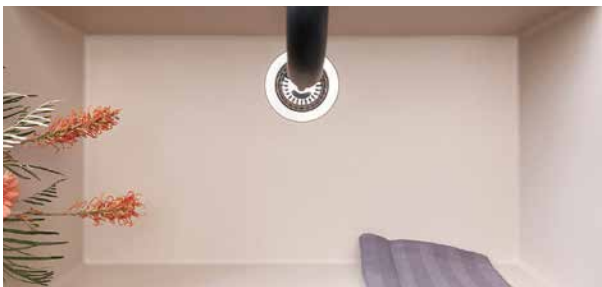

You will see these characteristics in the New York range by Reginox. These sinks have a sleek and modern design, they are deep-drawn without welding or folded seams. The new comfort plug waste outlet also means there is less chance of leaks and bacteria build up, as well as adding to the sleek appearance of the whole sink.

# REGINOX

# 4.

Our sinks are made in fireclay ovens meaning they are superior in strength and have a high glossy finish. Due to this manufacturing process these sinks do have a tolerance either way. Our ceramic range has a range of variety from inset sinks with a drainer to under mount sinks without drainer.

Available in  
20 models and  
5 colours

## 5. REGINOX INSET

The R18 series is made from the best steel and is characterized by its inset installation. With our lifetime guarantee on stainless steel sinks, you will enjoy our sinks for years to come. For our integrated, semi-integrated and under build installation options, take a look at our L18 series.

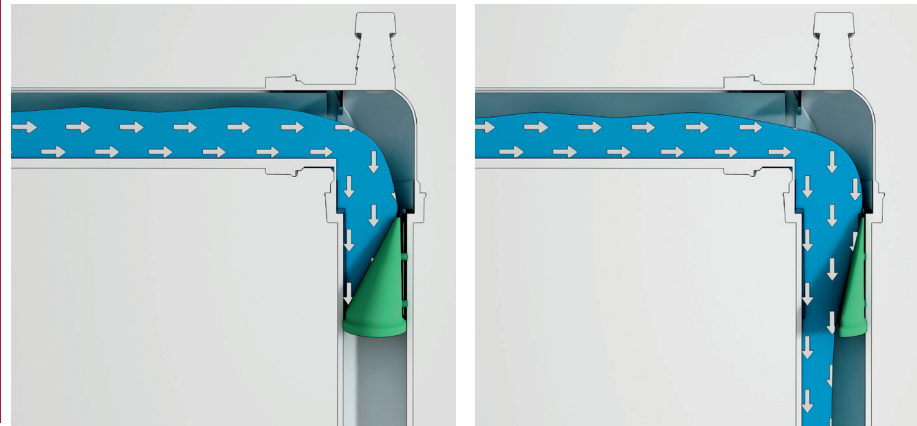

## RGX PANAMA 6.

The Panama Siphon from RGX is a smart space-saving siphon. Panama is a complete drainage system which saves a lot of space in every cabinet. The P-Trap is replaced with an integrated recoil rubber valve, preventing gas and water from coming back up the drain.

### Panama Canal Section

The Panama Siphon is named after the Panama Canal, which connects the Caribbean Sea with the Pacific Ocean. The Panama Canal is very important, as it shortens the distance required saving the trip around South America. With the Panama Siphon there is no need for a detour, the water flows directly from the sink to the sewer.
